

COMMScope®

CONNECTING
PEOPLE, NETWORKS,
AND TECHNOLOGY

at home, at work, and on the go

THIS IS CO

THE COMMSCOPE STORY

Right now millions of people around the world are texting, tweeting, messaging, and posting...downloading apps, books, and music...uploading videos and photos...managing the business of life at home, at work, and on the go...sharing content, knowledge, and hope—and in some countries, enjoying access to networked communication for the first time.

It's all made possible by the networks you, our customers, build. At any given moment, you help people, businesses, and governments across the globe operate, expand, and connect. Your role is exciting yet challenging. You have to make hundreds of decisions on any given day on any given continent. You have to ask the tough questions: how will technology change five years from now? How much will it cost? And how fast can we get it done?

Here at CommScope, we embrace our role as a trusted resource, partner, and facilitator. We help you determine the best decisions and answer those tough questions. We create the infrastructure that connects the world and evolves with every advance in technology. We're proud to be a part of your network's story.

OUR PLACE IN YOUR WORLD

We understand your challenges better than anyone because we've played a role in virtually all the world's best networks. That's bound to happen when your roots stretch back to the formation of cable TV infrastructure, the first wireless networks, and networking of the world's first data centers and intelligent buildings. We've been at the forefront of 2G, 3G, and now 4G, as well as all major developments of coax, twisted pair, and fiber optic infrastructure products for more than three decades.

Today, corporate LANs, cell phone networks, the Internet, on-demand cable TV, and other advanced networking applications all depend on technology we've developed. Our network infrastructure portfolio has everything you need to build a network, from wired and wireless to end-to-end solutions for Radio Frequency (RF) and Internet Protocol (IP) transmission. As much as technology changes, our goal remains the same: to help you create, innovate, design, and build faster and better than ever.

SOLVING PROBLEMS TOGETHER

We're immersed in the technical and conceptual challenges you face every day, from changing economies, markets, and protocols to bandwidth and technology overlays. By investing all of our capabilities, resources, relationships, and products into your toughest challenges, we continue our long history of solving problems together—paving the way for new ideas and fresh ways of thinking.

There are also extraordinary times, such as natural disasters, that challenge the best of people and networks. CommScope supports the global community with critical supplies and works quickly to restore vital communication after earthquakes, hurricanes, and ice storms—our people have even hiked for miles through China's rugged, remote terrain after severe winter storms with heavy equipment on their backs to accomplish this goal. We aspire to be a strong partner, a trusted resource, and a good neighbor.

A FOOTPRINT IN EVERY CULTURE

As a critical link between continents and technology, CommScope maintains people, facilities, and partners in every region of the world. We believe that having a presence the world over is like having a footprint in every culture. It's a mindfulness of people and place that resonates across continents. It helps shape our perceptions so that no matter where you are, we're speaking your

at home

It's a high-bandwidth world. Network operators face an escalating demand for digital voice, high-speed data, and high-definition video, as well as new technologies like fiber to the home and 3D TV. CommScope provides innovative optical and RF infrastructure solutions that help operators plan, deploy, and maintain services to residential and commercial customers.

at work

It's an intelligent world. High-speed networking, cloud computing, data center consolidation, and in-building wireless coverage are transforming the way businesses and public entities operate. CommScope solutions empower communications applications in the boardroom, operating room, and classroom... on trains, in airports, and in stadiums...and anywhere people gather for work and play.

on the go

It's a wireless world. People want to connect anywhere, anytime, everywhere—all the time—including residents of some countries, who are enjoying access to wireless communication for the first time. CommScope solutions span the entire RF landscape, helping wireless carriers manage increasing cell site complexity and optimize network planning, capacity, coverage, and performance.

MMSCOPE

language. So we can have more of the big conversations, like, what is tomorrow's evolution, and how can I prepare for it today.

Our global presence also heightens our awareness of and commitment to managing and mitigating the environmental footprint of our business, from manufacturing operations and product development to distribution and logistics. To date, 14 facilities in CommScope's global manufacturing network have been certified ISO 1400—this designation acknowledges our long history of operational excellence and environmental stewardship.

PERFORMANCE UNDER PRESSURE AROUND THE WORLD

Imagine thousands of people simultaneously using their smart phones and mobile devices at the Super Bowl 2011 in Texas... the 2010 FIFA World Cup Games in South Africa ...and the Beijing 2008 Olympics. Now imagine thousands of people using network-connected devices at the same time in train tunnels, on planes, across campuses, in office buildings, and government centers around the world...in every weather extreme possible.

People have come to rely on CommScope solutions to perform under every pressure, everywhere,

every time. You'll find that all of our products are designed and constructed for consistency and high quality from factory to factory, batch to batch, and end-to-end...wherever and whenever you need it. We do this because we believe that every opportunity to connect and share is important. Whether it's at the big game, on the train home from work, in the office, or in your own backyard, every conversation—every message—matters.

INNOVATE, INTEGRATE, OPTIMIZE

The future of technology evolves faster every day. CommScope helps you anticipate trends and prepare for new technology, from 100 Gb/s enterprise networks and fiber to the home to 4G cell networks, with more to come. New generations of our cabling, wireless, and intelligent infrastructure solutions are fueling major advances in information technology.

We put our best minds to work for you, developing new wired and wireless innovations. Over the last decade, we've invested more than \$1 billion on research and development—and that's just the beginning. Our extensive research and expertise helps us keep your finger on the pulse of the industry.

We're building the infrastructure for tomorrow's technology today so you'll be ready for expansion, technology improvements, and new markets and trends with fully integrated and optimized networks, buildings, and data centers.

IT'S ABOUT PEOPLE: YOURS AND OURS

We invest in people as much as our products and our industry. Our comprehensive training and education programs, participation in working groups on specs and standards, educational conferences, and extensive research are long-standing traditions that help everyone in our industry. As a global employer, CommScope is proud to support thousands of families. We take care of our people so they can focus on taking care of you and your business, often going above and beyond in the factory, on the phone, in the field, and on site.

It's our commitment to people and to the communities we live and work in that drives us to innovate products, services, and practices that are safe and sustainable for our environment. Our green initiatives—from recycling more than 55 million pounds of solid waste material annually to harvesting 66 million liters of rainwater for facility use and replenishing local lakes, streams, and rivers—help us all breathe a little easier.

YOUR SUCCESS IS OUR STORY

We're a trusted resource and partner around the world because we're invested in you: your people, your networks, your success. It inspires us to build relationships and infrastructure...connect people and technologies across protocols, oceans, and time zones...and share what we learn along the way. We'll never stop connecting and evolving networks for the business of life at home, at work, and on the go. This is our promise to you.

THIS IS COMMSCOPE

CommScope has played a role in virtually all the world's best communication networks. We create the infrastructure that connects people and technologies through every evolution. Our portfolio of end-to-end solutions includes everything our customers need to build high-performing wired and wireless networks. As much as technology changes, our goal remains the same: to help our customers create, innovate, design, and build faster and better. We'll never stop connecting and evolving networks for the business of life at home, at work, and on the go.
