

## Top 10 Reasons to Invest in a CommScope® LazrSPEED® Solution

### 1 Peace of mind with cutting edge fiber technology

Next generation technology with cutting edge performance, backed by the world-renowned CommScope Labs and the industry-leading CommScope Extended Product Warranty and Applications Assurance. Take advantage of the latest technology with assurance, safety and confidence.

### 2 Product choice

Not all companies and networks are the same. LazrSPEED® 550, 300 and 150 solutions offer network designers the capability to address distance and flexible network topologies.

### 3 It's an end-to-end solution

The CommScope LazrSPEED solution includes a variety of fiber, cable, apparatus and connectivity options to address traditional and non-traditional network designs.

### 4 Superior channel performance

Exceptional channel performance is realized through the use of high bandwidth, high quality optical fiber; robust cables and cable assemblies; as well as low loss LC and MPO connectivity.

### 5 It is time to lay the foundation for bandwidth migration

This fiber is ready to cope with current requirements of 1 Gb/s and 10Gb/s. Future requirements of 40 Gb/s and 100Gb/s can also be addressed with the LazrSPEED solution.

### 6 Ultimate bandwidth performance

LazrSPEED is a laser optimized, high bandwidth product designed for use with laser sources. The products are suitable for use with serial and parallel transmission systems.

### 7 Essential transmission distance

Incredible distance performance covering more than 95% of building backbones.

### 8 Lowest cost per bit

More bits per fiber and radically simpler opto-electronics for 10 Gb/s transmission.

### 9 Complete applications coverage

All applications from 10 Kb/s to 10 Gb/s, and beyond.

### 10 Availability

Available now through all CommScope BusinessPartners worldwide, so you can build a future proofed network today.
