

What exactly does “value” look like?

For starters, it's round, 0.6 m in diameter, and features an unmistakable pattern of performance

The ValuLine Vision™ VHLP2 and VHLPX2 Microwave Antennas: A New Vision of Value.

**AT ANDREW SOLUTIONS,
WE DON'T BELIEVE YOU
SHOULD HAVE TO SACRIFICE
PRICE FOR PERFORMANCE.**

**The new ValuLine Vision™ VHLP2
(Single Pol) and VHLPX2 (Dual Pol)
0.6 m microwave antennas prove
you can have them both.**

In engineering the new VHLP2 and VHLPX2, we re-considered everything, right down to the box in which it is packaged. The result is evolutionary 0.6 m microwave antennas that deliver superior RF performance, and simplified maintenance.

Superior RF Performance

Using Andrew's patented Pattern Control Ring™ technology, the VHLP2 and VHLPX2 have robust electrical designs that deliver consistent and highly-controlled electrical performance. RF patterns are compliant to the highest regulatory standards, giving smooth, reliable deployment and proven performance for years to come, no matter how your network evolves.

EASIER INSTALLATION AND MAINTENANCE

The antenna mount design allows unencumbered access to the rear of the antenna. So the VHLP2 and VHLPX2 make installing components, such as radio equipment, easier and simplifies the routing of waveguides and cables. More than saving money during installation, the VHLP2 and VHLPX2 are less expensive to maintain. The antenna mounts allow gradual and smooth adjustment that simplifies alignment, even under the most adverse weather conditions.

LOW SHIPPING AND INVENTORY COSTS

The innovation in design even extends to the packaging of the antenna. By reconfiguring the shipping carton, we've reduced overall volume. So the VHLP2 and VHLPX2 are less expensive to ship and to warehouse. And that's good to know, considering 0.6 m antennas are the most requested size in the industry.

Global Manufacturing Support

Perhaps most importantly, the new VHLP2 and VHLPX2 are now being manufactured at Andrew locations around the world. Our worldwide manufacturing network means your shipping costs are lower, lead times are shorter, and inventory carrying costs are reduced. In short, the Valuline Vision™ VHLP2 and VHLPX2 may just be the most value-packed 0.6 m antennas you can buy.

VALULINE VISION™ VHLP2 AND VHLPX2 0.6 M MICROWAVE ANTENNAS: A NEW VISION OF VALUE.

Better RF performance, easier to install and maintain, cheaper to ship, quicker to get. At Andrew, value is so much more than price. Every day, we're expanding our vision of what value can be.

When You Envision Value – Think Andrew Solutions

Value – how do you see it? Is it a price tag or something more?

At Andrew value is not another selling point, not just one more adjective to throw into the mix. Value is the reason we are in business.

It is finding new and better ways to help you optimize your network performance while helping you hold the line on expenses, enabling you to provide more value to your customers. It involves scrutinizing every aspect of our business, down to the packaging of our antennas, in order to make your job easier, more productive, more profitable.

In short, value isn't another benefit we offer, it's why we get up in the morning. So we take it very seriously. Each day we push the envelope and re-envision what value can be. Not just for our customers, but for their customers as well.

Thinking lower total cost of ownership? Think Microwave. Think Andrew.

Andrew Solutions is committed to ensuring your success— from innovative microwave designs and the highest quality manufacturing to on-time shipping and delivery. Whether it's technical innovations, global points of view, or end-to-end solutions, Andrew is always thinking of new ways to help you and your bottom line. This is what Andrew's Microwave team aspires to be for you.
